| <input type="checkbox"/> FEATHERS | <input type="checkbox"/> BEHAVIOUR |
| <input type="checkbox"/> TAIL | <input type="checkbox"/> DROPPINGS |
| <input type="checkbox"/> | <input type="checkbox"/> |

To enable a regular check to be kept on your pet birds general health and condition, we have devised this simple **Weekly Pet Bird Health Checklist**.

Although these headings are only supplied as a guide, (and you can add to them in the spaces provided if you so wish), it should provide you with the basics to check on a regular basis.

All pet owners should be constantly aware of any change in their pets' health or general condition.

Using this checklist **EVERY WEEK** will help ensure that your pets basic health is being monitored, and alert you to any "out of the ordinary" conditions.

This information is for general guidance only. Should you have any concerns on any health matter relating to your pet, you should contact your vet, who will be happy to advise you.
